SYBASE®

PRODUCT SPECIFIC LICENSE TERMS
Sybase® IQ v12.7.x ("Program")

IN ADDITION TO THE LICENSE TERMS SET OUT IN THE SYBASE LICENSE AGREEMENT ACCOMPANYING THIS PROGRAM, THE FOLLOWING ADDITIONAL OR DIFFERENT RIGHTS AND ACCOMPANYING OBLIGATIONS AND RESTRICTIONS SHALL APPLY TO THE PROGRAM FOR WHICH YOU HAVE PURCHASED A LICENSE.

The Program may contain or be provided with component software products from both Sybase and third parties. Except as set forth below, use of all components is limited to use in the same manner and capacity for which the Program as a whole is licensed. Additional licenses for Sybase components may be available from Sybase for a fee.

I. Limitations on Use of Program. You may not use more than one (1) edition of the Program (i.e., Enterprise Edition, Extended Enterprise Edition and Single Application Server Edition) ("Program Editions") on the same target database. If you have a license for multiple Program Editions, each Program Edition must reside on a separate target database.

II. Sybase Restricted Use Components. The Program contains or is provided with the Restricted Use Components identified below. You are licensed without further charge to Use only one (1) copy of each Restricted Use Component on one (1) Machine. You may Use the Restricted Use Components solely in conjunction with your use of the Program, and subject to any Additional Restrictions set forth below.

Restricted Use Components	Additional Restrictions
Software Developer's Kit	May only be used to support internal functions of the Program. Software Developer's Kit may not be used for development or any other purpose.

III. Additional Program Restrictions.

A. Single Application Server Edition. If you purchase a license for the Single Application Server Edition of the Program, the following additional restrictions shall apply. The Single Application Server Edition of the Program ("Single Application Server Edition") is licensed for installation and use on no more than two (2) networked Machines, and each Machine shall be limited to a maximum of sixteen (16) CPUs. The license fees payable by you for the Single Application Server Edition shall be determined by calculating the total number of CPUs on which the Single Application Server Edition is licensed to run. The Single Application Server Edition may be used to manage up to twenty-five (25) tables across a maximum of one hundred (100) columns. For example, the Single Application Server Edition environment may manage (i) twenty-five tables with four (4) columns each or (ii) four (4) tables with twenty-five (25) columns each. You may not use the Single Application Server Edition in excess of the licensed Machine or table/column capacity without first paying additional license fees therefor. Any license fees paid for the Single Application Server Edition may be applied to a license credit towards an update to an unrestricted Sybase IQ license.

B. Extended Enterprise Edition. If you purchase a license for the Extended Enterprise Edition of the Program, the following additional restrictions shall apply. You are not required to install the IQ ETL server component on the same Machine(s) as the IQ server component of the Program, provided that your use of the IQ ETL server component is limited to the same number of CPUs running on the same Operating System Software for which the Program as a whole is licensed. For example, if the Program is licensed for 4 CPUs, the IQ server component may run on up to 4 CPUs and the IQ ETL server component may run on up to 4 CPUs where the IQ server component is not necessarily installed on the same Machine(s) as the IQ ETL server component. The IQ ETL server component may use non-IQ databases to stage data, provided the target database for such data must be the IQ server that is licensed as part of the Program. The IQ ETL Development client component may only be used for purposes of building and managing processes in the IQ ETL server component.

IV. Free Download Components.   The Program, including the Restricted Use Component, may include certain third party open source and other free download components ("Free Download Components"). You may have additional rights in the Free Download Components that are provided by the third party licensors of those components. The Free Download Components and any such third party licenses and third party-required notices for the Program are identified at http://www.sybase.com/thirdpartylegal (third party licenses and notices for Free Download Components included as part of the Restricted Use Component are identified under the name of that product). Any obligations undertaken by Sybase in the Agreement relating to the Free Download Components as part of the Program are provided by Sybase alone, and not by the third party licensors of the Free Download Components.   **A. FURTHER DISCLAIMER OF WARRANTIES AND LIABILITIES.** The Free Download Components are provided "AS IS" by the third party licensors, who disclaim all liabilities, damages (even if they have been advised of the possibility of such damages), warranties, indemnities and other obligations of any kind, express or implied, with regard to the Free Download Components. Nothing in the foregoing affects any performance warranty provided by Sybase with regard to the Program as a whole. **B. DISCLAIMER OF INDEMNITIES.** The Free Download Components are excluded from any indemnity provided by Sybase or its subsidiaries in the Agreement.

V. Options.

A. Terms Applicable to the Large Objects Management Option ("LOB Option") for the Program. If you purchase a license for the LOB Option, the license type and quantity of CPUs you license must correspond to the license type and number of CPUs for which the Program has been licensed.

B. Terms Applicable to the Encrypted Column Option. If you purchase a license for the Encrypted Column Option, the license type and quantity of CPU's you license must correspond to the license type and number of CPUs for which the Program has been licensed.
